

REMARKS

Currently claims 1, 3-18 and 24-35 are pending in the application.

Claims 1, 3-18 and 24-35 were rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as their invention.

Claim 1, 3-18 and 24-35 were rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

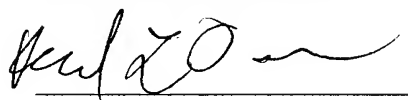

By this amendment, applicants have specified the range by volume of 4-10% of both host materials, which is fully supported by the specification. This addition to the change should correct the rejections kindly noted by the Examiner.

New claim 36 has been added to provide applicants with the scope of protection to which they are entitled. NPB is of course an arylamine and applicants believe that their specification clearly demonstrates that arylamines can be effectively used as a cohost with anthracene in the context of new claim 36. Applicants further submit that none of the cited references provide an enabling disclosure of a cohost arylamine as set forth in new claim 36. Therefore, they can not be effectively applied as a reference. For the same reasons that claim 1 is believed to be allowable, applicants believe that claim 36 should be allowable.

It is believed that these changes now make the claims clear and definite and, if there were any problems with these changes, Applicants' attorney would appreciate a telephone call.

In view of the foregoing, it is believed that none of the references, taken singly or in combination, disclose the claimed invention. Accordingly, this application is believed to be in condition for allowance, the notice of which is respectfully requested.

Respectfully submitted,

Attorney for Applicant(s)
Registration No. 22,363

Raymond L. Owens/djw
Rochester, NY 14650
